Are you a Growing Company that has too much work for your current employees? Did you just start a Project and you need someone with additional Expertise? Do you have staff that needs to get up to speed? You want to update your skills so you can compete on a larger scale?

Congratulations on finding this site!!!

Why Congratulations? Because if you are here, it's because you are looking for help, and I can provide it.

My goal is to help you best fulfill yours, Whatever it may be.

There are many different ways for me to assist you in making your office more productive.

- You might call me to help with a project that you need more manpower on
- I can work with your current employees in order for them to be able to handle the load in the future.
- Increase productivity, whether it be through training, organization through databases, or ease of communication with better network access, and resources.

What can I help with?

- Overload Drafting work Civil or Mechanical; 2D or 3D
- Drawing Conversions
- Hand to CAD; 2D to 3D
- Expertise / Consulting
- You don't have someone in-house that can do the job
- You have an Idea and want Drawings for a Patent or to make it
- Training
- CAD or Office Software
- Networking Design, Setup, or Maintenance
- Databases Design and Training

I am very familiar with AutoCAD, SolidWorks, and most Microsoft Office Products. I currently Teach AutoCAD, Inventor and Office at Local Colleges. By teaching these products I have established a much greater grasp of them; Thus, enabling me to be much better at using them as well as instructing others.

Don't miss my Blog.... I am adding posts on issues that my students have problems with, Also I am preparing planned lessons covering AutoCAD and General Drafting techniques.
