Can you e-mail me that file, or give it to me on a disk?

Is this something that you hear between employees at your office? Â Why are your employees wasting time transfering files to each other with e-mail and Disks while they are in the same office? If they all have internet connections then you already have a small network setup, and it's time to start using it. Networks help people to work better togeather, and waste less time looking for files. Â

Let me come and help you to decide what type of network fits your company best. From small Peer-to-Peer networks to Large Windows and Novel Networks I have worked with them all, and can help you find the best option.
 - Design Network
 - Setup Servers & Clients
 - Run Cabling
 - VPN Setup

 - Setup Wireless Access Â

Peer-to-Peer and Server Networks
