Civil Engineering Makes the world work.

As I tell my students: Things inside the Building are Mechanical, The building it's self is Archetectural or Structural, and everything outside, and below is Civil. I have done work in General, Geotechnial, and Environmental Civil Engineering.

My experiance with Civil Engineering includes:

- Subdivision Layout & Street Profiles
- Phase 1 Research & Figure Prep
- LUST Site Monthly Reporting & Plume Tracking
- Geotracker Uploads
- Borehole Logs
